

# HLA-Ready Gene/+Taq

## THE SSP-PCR SYSTEM

CE certified detection of HLA-class I and II alleles

**NOW AVAILABLE:**  
**- READY GENE ONLINE SOFTWARE**  
**- TAQ INCLUDED IN BUFFER**

Ready Gene

## HLA-READY GENE

HLA-Ready Gene A, -B, -C, -DRB1/3/4/5, -DQA1, -DQB1, -DPA1 AND -DPB1

- Integrated detection of the nullalleles A\*24:09N, B\*51:11N, C\*04:09N, DRB4\*01:03N, DRB5\*01:08N
- Integrated negative control
- Short analysis due to allele specific amplification
- Regular update of allele list
- Simplified interpretation by given allele frequencies
- Pre-aliquoted and dried primer mixes
- Colour coded kits
- Reduction of mistakes by means of changing internal control amplicates
- Flexibility due to combination of the PCR trays
- One PCR programme for all systems
- Identical workflow with protocol sheets adapted for all kits
- Evaluation by Ready Gene Online software
- CE certified for IvD use

## HLA-READY GENE<sup>+Taq</sup>: The new HLA-Ready Gene kits with Taq included

NEW

- Full plate kits HLA-Ready Gene ABC<sup>+Taq</sup>, ABDR<sup>+Taq</sup>, DRDQDP plus<sup>+Taq</sup> with Taq polymerase included in the buffer
- HLA-Ready Gene DRDQDP plus<sup>+Taq</sup> with DQ/DP alpha and beta-chains
- More safety - whole system is CE certified
- More comfort - 1 tube of ReadyMix including Taq per typing
- Quicker assay performance - less hands-on time

## READY GENE ONLINE SOFTWARE
