

„QTRACE® qPCR Post Transplant Monitoring – the alternative to STR” July 28th 2021, 4 – 5 pm (CET)

A fast, efficient, and sensitive method is mandatory after hematopoietic stem cell transplantation. QTRACE® identifies and quantifies traces of DNA with a sensitivity of 0.1%.

The free webinar will give an introduction of the TaqMan® based QTRACE® System and the intuitive TRACE® software that supports the whole process from patients data entry up to the final report during the whole monitoring period.

Speaker:	Sabine Scholz , Product Manager inno-train
Platform:	Microsoft „Teams“ (browser-based, i.e. without registration/ download)
System requirements:	Email address on the PC with which you are participating to the webinar, PC with Windows 10 with pre-installed MS Edge Browser, Loudspeaker und microphone (ideally a headset) and eventually a camera to be connected visually.

PROGRAM July 28th 2021, 4 – 5 pm (CET):

- Lecture „QTRACE® – qPCR Chimerism Monitoring. The Software and the Workflow “
- Questions & Answers

Please register for the free webinar via Email at webinar@inno-train.de

Doing this, please tell us your whole name and the institute you are working in.
